Hana Habtamu

Full-Stack & Information Systems Developer

hanahabtamu735@gmail.com | Ambo University, Weliso Campus, Ethiopia | github.com/hanahabtamu | linkedin.com/in/hanahabtamu

PROFESSIONAL SUMMARY

Third-year Information Systems student and full-stack developer with over a year of hands-on experience building and deploying web platforms, organizational management information systems and mobile-responsive applications. Bridges systems analysis with software engineering: secure Laravel/PHP backends, MySQL/PostgreSQL schema design and fast React interfaces. 2nd-place winner at the Ambo University Cursor Hackathon.

TECHNICAL SKILLS

- **Frontend:** React.js (Hooks, component architecture, state management), JavaScript (ES6+), HTML5, CSS3, Flexbox, CSS Grid, responsive UI/UX
- **Backend:** Laravel (MVC, Eloquent ORM, middleware, auth), PHP (OOP), RESTful APIs
- **Databases:** MySQL, PostgreSQL, schema design, normalization, query optimization, ER diagrams
- **Tools & Practices:** Git & GitHub, Vite, systems analysis, UI prototyping, Agile collaboration, mobile-first design

PROJECTS & EXPERIENCE

Integrated NGO Resource & Sponsorship Management System (IFSO) — Full-Stack Developer · React, Laravel, MySQL

- Built a production MIS connecting foreign donors with vulnerable families, with a sponsor–beneficiary dashboard and real-time fund tracking.
- Implemented multi-channel financial tracking (bank transfer, Telebirr, Commercial Bank of Ethiopia, cash) with audit logs.
- Developed case management modules for social welfare progress and staff field-visit logs.

Ethiopian Orthodox Tewahedo Church (EOTC) Platform — Full-Stack Developer · Laravel, PHP, MySQL

- Created an interactive multilingual scripture reader with daily verse modules.
- Developed a global church directory with interactive mapping and parish finder.
- Implemented secure donation workflows and role-based access control (RBAC).

Nash Dental Clinic Healthcare Platform — Frontend Developer · React, JavaScript, HTML5, CSS3

- Built an online appointment booking flow with real-time slot selection.
- Integrated WhatsApp, telehealth inquiry and click-to-call; designed a mobile-optimized service catalog.

Personal Developer Portfolio — Designer & Developer · React, Vite, JavaScript, Vanilla CSS

- Lightweight, high-performance portfolio with a custom design system and interactive case studies.

EDUCATION

BSc in Information Systems (3rd Year) — Ambo University, Weliso Campus, Ethiopia
Systems Analysis & Design · Database Management & Data Modeling · Software Engineering Lifecycle · Object-Oriented Programming · Web & Mobile Application Architecture

HONORS & AWARDS

2nd Place & Certificate of Achievement — Cursor Hackathon, Ambo University. Collaborated with a team to design, prototype and pitch a software solution under tight deadlines; recognized for speed, teamwork and practical implementation.

STRENGTHS

Systems thinking and analytical problem solving · Fast learner, adaptable to new tools · Cross-functional teamwork and clear communication · Passion for clean, maintainable, user-friendly software
